

California QSO Party

2022-2025 US/VE Mult Rareness Data

- Based on CQP logs received from inside CA.
- The table starting on the next page contains data intended to show which US and VE multipliers could benefit from more activity in CQP.
- The difference between a well covered US/VE mult and a rare one is often just one serious station. It only takes one station to make an enormous difference in the contest. Please consider being that station this year!
- The following data is based on 383 logs submitted by stations inside California in CQP 2025.
- Additional Canadian multipliers were added in 2023. This is the reason for some N/A entries in the following table for years prior to 2023.
- Some multipliers that appear safe in this list can always become rare if one serious station from last year is unable to participate this year. Don't underestimate the positive impact that your participation will have in your multiplier!
